Stage 1 Strategic Flood Consequences Assessment Pembrokeshire and Carmarthenshire County Councils
Risk Categorisation Candidate Sites Carmarthenshire County Council (CCC) - Climate Change Allowance

Legend:
- River Network
- National Park Boundaries
- CCC Flood Risk Management Plan
- Flood Zones
- Settlement Boundaries
- Flood Defences
- National Park Boundaries
- CCC Flood Risk Management Plan
- Flood Zones
- Settlement Boundaries
- Flood Defences

Notes:
1. NRW Flood Zone 2 - Assumed to approximate to 1 in 100 (1%) annual chance event with climate change.
2. The Surface Water Flood Extents are based on NRW's updated Flood Map for Surface Water (uFMfSW) - a broad scale assumption has been made for Stage 1 screening:
   - Current: 1 in 1000 (0.1%) annual chance flood outline becomes 1 in 100 (1%) with climate change.
3. Shoreline Management Plan 2 data - Flood extent is current 1 in 1000 (0.1%) tidal event plus 2m Sea Level Rise (SLR).
4. The maximum 0.5% annual chance or greater extreme tide level plus sea level rise is 6.9m. A coarse 7m contour (not shown) has also been used to screen tide risk for coastal sites - see Stage 1 SFCA Report.

Figure Title
3. Shoreline Management Plan 2 data - Flood extent is current 1 in 1000 (0.1%) tidal event plus 2m Sea Level Rise (SLR).
